- 03 Introduction to HARVEST™ fruit collectors
- 06 Standard fruit collectors
- 10 Fruit collectors with a leaf blower
- 12 Fields of use

About HARVEST™

HARVEST™ was founded in 2018 with the aim of making it easier, faster, and cheaper for fruit producers to harvest fruit since the profitability of the entire production depends on it. As a solution, a fruit collector is presented - a device that works perfectly in combination with a fruit shaker (of any kind). When shaking the fruit with a shaker, the fruits do not fall to the ground (or to the nylon or the net that is placed below), but to the collector who collects all the fruits and packs them undamaged in crates. Access to the tree is extremely quick and easy, and the filled crates are easily replaced by empty ones. As harvesting has proven to be exceptionally efficient and practical (as well as cost-effective) in this way, an increasing number of fruit growers are starting to use fruit collectors. They no longer wait for a "good" year to make money. Now every year is good, fruitful, and prosperous for them.

A photograph of a blueberry orchard. In the foreground, a blue tarp is spread on the ground, and a red tractor is partially visible. The background is filled with blueberry bushes and trees laden with ripe, dark blue fruit. The text is overlaid on the center of the image.

The fruit collector simplifies, speeds up and reduces the cost of the fruit harvesting process. It can be used in combination with any type of shaker.

The traditional plum harvest has been completely replaced due to the lack of workers by the new way of harvesting with the help of shakers and fruit collectors.

Standard

Fruit collector 2.4m

The most compact fruit collector available at the moment with adjustable operating height, width, and angle. A great choice for the young, densely planted fruit. The most used for sour cherries.

Price: 422€

Weight	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
37kg	45cm	95-115cm (canvas-net to ground)	100-120cm (base width)	2.4m

Fruit collector 3.3m

Top seller fruit collector in the previous two years. A great choice for sour cherry plantations of various types; plum, nut, and olive high-density plantations. Adjustable operating height, width and angle.

Price: 462 €

Width	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
40kg	45cm	100-120cm (canvas-net to ground)	100-120cm (base width)	3.3m

fruit collectors

Fruit collector 4m

The canvas-net diameter of 4 meters with an evenly light base (adjustable operating width, height, and angle). A great choice for fruit with a trunk diameter up to 4m. The most used for plums, nuts and olives.

Price: 528 €

Weight	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
44kg	45cm	107-127cm (canvas-net to ground)	100-120cm (base width)	4m

Fruit collector 5m

The largest fruit collector available at the moment. A great choice for low-density plantations with a trunk diameter of up to 5 meters. The most used for olives, nuts, plums. Adjustable operating height, width, and angle.

Price: 594 €

Weight	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
48kg	45cm	115-135cm (canvas-net to ground)	100-120cm (base width)	5m

A photograph showing two men in a field. One man, wearing a wide-brimmed hat and a light-colored t-shirt, is pushing a red motorized tool. The other man, wearing a white t-shirt and shorts, is standing next to it. The tool is pulling a large black canvas net under a tree canopy. The background shows a clear blue sky and a line of trees in the distance.

Depending on the diameter of the canopy, choose a collector with the appropriate canvas-net diameter.

**No workers?
No problem.**

**Fruit collectors make
harvesting a lot easier.**

Fruit collectors

Fruit collector 2.4m with leaf blower

The ultimate fruit collector with a leaf blower for high-density plantations. Compatible with fruit shakers of any kind due to adjustable operating height, width, and angle. A powerful engine with a precise blowing stream eliminates everything but fruit.

Price: 858 €

Weight	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
45kg	45cm	95-115cm (canvas-net to ground)	100-120cm (base width)	2.4m

Fruit collector 3.3m with leaf blower

The real power of this fruit collector lies in the fact that it is compact, easily transported in a car booth, and operated by only one operator. A great choice for plum, cherry, nut, and olive plantations. The leaf blower with adjustable air stream level.

Price: 898 €

Weight	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
48kg	45cm	100-120cm (canvas-net to ground)	100-120cm (base width)	3.3m

with leaf blowers

Fruit collector 4m with leaf blower

This collector with a leaf blower is the ultimate choice for fruit with a trunk diameter of 3-4 meters. Adjustable operating width, height, and angle make the harvesting process easy even on the sloppy terrain.

Price: 924 €

Weight	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
52kg	45cm	107-127cm (canvas-net to ground)	100-120cm (base width)	4m

Fruit collector 5m with leaf blower

The most powerful fruit collector due to its dimensions and capabilities. Perfect for large/mature/low-density plantations. Fruit cleaning and selection with zero effort needed.

Price: 990 €

Weight	Minimal trunk height	Height settings	Width settings	Canvas-net diameter
56kg	45cm	115-135cm (canvas-net to ground)	100-120cm (base width)	5m

Fields of use

Sour cherry

Harvesting process without workers with the help of shakers and fruit collectors.

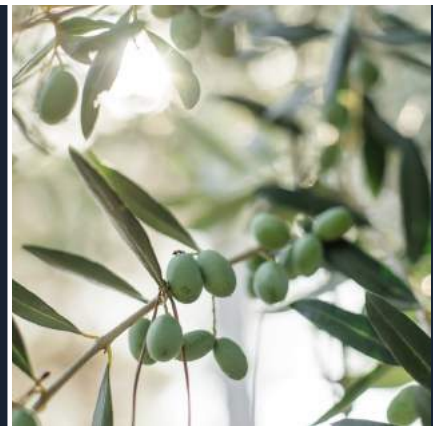

Plum

Quick, easy and profitable. Harvest plums in a modern way without fatigue.

Olive

Olive harvest made easy. Smart growers know how.

Nuts

No more problems for nut growers. With the shaker and collector everything is simple.

A man wearing a grey hat and dark overalls over a maroon shirt stands with his back to the camera, arms raised in a gesture of triumph or relief. He is in a field of green trees, likely a cherry orchard. The background is slightly blurred, showing more trees and a bright sky.

**I finally know how
to harvest with ease.**
- Sour cherry grower from
Leskovac, Serbia
